

NAME

`aseqdump` - show the events received at an ALSA sequencer port

SYNOPSIS

`aseqdump` [*-p client:port,...*]

DESCRIPTION

`aseqdump` is a command-line utility that prints the sequencer events it receives as text.

To stop receiving, press Ctrl+C.

OPTIONS

-h,--help

Prints a list of options.

-V,--version

Prints the current version.

-l,--list Prints a list of possible input ports.

-p,--port=client:port,...

Sets the sequencer port(s) from which events are received.

A client can be specified by its number, its name, or a prefix of its name. A port is specified by its number; for port 0 of a client, the :0 part of the port specification can be omitted.
