

**NAME**

`aseqdump` - show the events received at an ALSA sequencer port

**SYNOPSIS**

`aseqdump` [-*p client:port,...*]

**DESCRIPTION**

`aseqdump` is a command-line utility that prints the sequencer events it receives as text.

To stop receiving, press Ctrl+C.

**OPTIONS**

*-h,--help*

Prints a list of options.

*-V,--version*

Prints the current version.

*-l,--list* Prints a list of possible input ports.

*-p,--port=client:port,...*

Sets the sequencer port(s) from which events are received.

A client can be specified by its number, its name, or a prefix of its name. A port is specified by its number; for port 0 of a client, the :0 part of the port specification can be omitted.
