

NAME

infotocap - convert a *terminfo* description into a *termcap* description

SYNOPSIS

infotocap [-vn *width*] [-V] [-1] [-w *width*] *file* . . .

DESCRIPTION

infotocap looks in each given text *file* for **terminfo** descriptions. For each terminfo description found, an equivalent **termcap** description is written to standard output. Terminfo **use** capabilities are translated directly to termcap **tc** capabilities.

-v print out tracing information on standard error as the program runs.

-V print out the version of the program in use on standard error and exit.

-1 cause the fields to print out one to a line. Otherwise, the fields will be printed several to a line to a maximum width of 60 characters.

-w change the output to *width* characters.

FILES

/etc/terminfo Compiled terminal description database.

NOTES

This utility is actually a link to *tic*, running in *-C* mode. You can use other *tic* options such as **-f** and **-x**.
