NAME

lxpanel - a lightweight GTK2-based panel for the LXDE desktop.

SYNOPSIS

lxpanel

DESCRIPTION

This manual page documents briefly the **lxpanel** command.

lxpanel is a program that provides a panel for the desktop, usually for LXDE. It is a lightweight GTK+ 2.x based desktop panel.

Features

- User-friendly application menu automatically generated from .desktop files on the system.
- Launcher bar (small icons clicked to launch apps)
- Task bar supporting ICCCM/EWMH 'urgency hint (Pidgin IM windows can flash on new incoming messages)
- Notification area (system tray)
- Digital clock
- Run dialog (type command to run, without opening a terminal)
- Net status icon plug-in (optional)
- Volume control plug-in (optional)
- lxpanelctl, an external controller lets you control lxpanel in other programs. For example, lxpanelctl run will show the Run dialog in lxpanel, and lxpanelctl menu will show the application menu. This is useful in key bindings provided by window managers.

OPTIONS

This program follows the usual GNU command line syntax, with long options starting with two dashes ('-). A summary of options is included below.

-h --help
> Print help on the options.

-v --version
> Print the program version.

--log *level*
> Set the logging level in the range 0 (silent) through 5 (verbose).

-p *NAME*, **--profile** *NAME*
> Set the profile to be loaded.

FILES

˜/.config/lxpanel/*PROFILE*
> config file, can be edited by preference dialog.

SEE ALSO

lxsession (1), lxpanelctl (1).
