

NAME

lxsession - a lightweight X session manager

SYNOPSIS

lxsession

DESCRIPTION

This manual page documents briefly the **lxsession** command.

lxsession is a program that provides a X11 session manager. It is the default X11 session manager of LXDE.

A session manager is used to automatically start a set of applications and set up a working desktop environment. Moreover, when the user logout, it remembers the applications in use, and restart them the next time you login.

SEE ALSO

lxpanel (1), [lxsession-logout\(1\)](#).
