

NAME

`resolve_stack_dump` - resolve numeric stack trace dump to symbols

SYNOPSIS

`resolve_stack_dump` [*options*] *symbols_file* [*numeric_dump_file*]

DESCRIPTION

`resolve_stack_dump` resolves a numeric stack dump to symbols.

Invoke `resolve_stack_dump` like this:

```
shell> resolve_stack_dump [options] symbols_file [numeric_dump_file]
```

The symbols file should include the output from the `nm --numeric-sort mysqld` command. The numeric dump file should contain a numeric stack track from `mysqld`. If no numeric dump file is named on the command line, the stack trace is read from the standard input.

`resolve_stack_dump` supports the following options.

- **--help, -h**
Display a help message and exit.
- **--numeric-dump-file=***file_name*, **-n** *file_name*
Read the stack trace from the given file.
- **--symbols-file=***file_name*, **-s** *file_name*
Use the given symbols file.
- **--version, -V**
Display version information and exit.
