

NAME

select-editor - select your default sensible-editor from all installed editors

SYNOPSIS

select-editor

DESCRIPTION

select-editor provides a coherent mechanism for selecting and storing a preferred sensible-editor on a per-user basis. It lists the available editors on a system and interactively prompts the user to select one. The results are stored as `SELECTED_EDITOR` in `~/selected_editor`, which is sourced and used by `sensible-editor`. `SELECTED_EDITOR` is overridden by the `VISUAL` and `EDITOR` environment variables.

AUTHOR

select-editor was written by Dustin Kirkland <kirkland@canonical.com>.
