

**NAME**

xarchiver - GTK+ frontend for most used compression formats

**SYNOPSIS**

**xarchiver** [OPTION...][*archivename*]

**DESCRIPTION**

Xarchiver is a lightweight desktop environment independent GTK+ 2 frontend for manipulating 7z, arj, bzip2, gzip, rar, tar, zip, rpm, and deb files. It allows you to create archives and add, extract, and delete files from them. Password protected archives in the arj, 7z, rar, and zip formats are supported.
