NAME

mq_getsetattr - get/set message queue attributes

SYNOPSIS

#include <sys/types.h>
#include <mqueue.h>

int mq_getsetattr(mqd_t *mqdes***, struct mq_attr ****newattr***,**
 struct mq_attr **oldattr***);**

Note: There is no glibc wrapper for this system call; see NOTES.

DESCRIPTION

Do not use this system call.

This is the low-level system call used to implement mq_getattr(3) and mq_setattr(3). For an explanation of how this system call operates, see the description of mq_setattr(3).

CONFORMING TO

This interface is nonstandard; avoid its use.

NOTES

Glibc does not provide a wrapper for this system call; call it using syscall(2). (Actually, never call it unless you are writing a C library!)

SEE ALSO

mq_getattr(3), mq_overview(7)

COLOPHON

This page is part of release 3.74 of the Linux *man-pages* project. A description of the project, information about reporting bugs, and the latest version of this page, can be found at http://www.kernel.org/doc/man-pages/.
