

**NAME**

Dpkg::Exit - program exit handlers

**DESCRIPTION**

The Dpkg::Exit module provides support functions to run handlers on exit.

**FUNCTIONS**

*push\_exit\_handler(\$func)*

Register a code reference into the exit function handlers stack.

*pop\_exit\_handler()*

Pop the last registered exit handler from the handlers stack.

*run\_exit\_handlers()*

Run the registered exit handlers.

**CHANGES****Version 1.01**

New functions: *push\_exit\_handler()*, *pop\_exit\_handler()*, *run\_exit\_handlers()*

Deprecated variable: **@handlers**

**Version 1.00**

Mark the module as public.
