

NAME

Dpkg::Vendor::Ubuntu - Ubuntu vendor object

DESCRIPTION

This vendor object customize the behaviour of dpkg-source to check that Maintainers have been modified if necessary.

PUBLIC FUNCTIONS

`$bugs = Dpkg::Vendor::Ubuntu::find_launchpad_closes($changes)`

Takes one string as argument and finds “LP: #123456, #654321” statements, which are references to bugs on Launchpad. Returns all closed bug numbers in an array reference.

CHANGES**Version 0.xx**

This is a semi-private module. Only documented functions are public.
