

NAME

`creal`, `crealf`, `creall` - get real part of a complex number

SYNOPSIS

```
#include <complex.h>
```

```
double creal(double complex z);
```

```
float crealf(float complex z);
```

```
long double creall(long double complex z);
```

Link with `-lm`.

DESCRIPTION

The `creal()` function returns the real part of the complex number `z`.

One has:

$$z = \text{creal}(z) + I * \text{cimag}(z)$$
VERSIONS

These functions first appeared in glibc in version 2.1.

ATTRIBUTES

Multithreading (see `pthread(7)`)

The `creal()`, `crealf()`, and `creall()` functions are thread-safe.

CONFORMING TO

C99.

NOTES

The gcc supports also `__real__`. That is a GNU extension.
