

NAME

ExtUtils::MY - ExtUtils::MakeMaker subclass for customization

SYNOPSIS

```
# in your Makefile.PL
sub MY::whatever {
    ...
}
```

DESCRIPTION**FOR INTERNAL USE ONLY**

[ExtUtils::MY](#) is a subclass of ExtUtils::MM. Its provided in your Makefile.PL for you to add and override MakeMaker functionality.

It also provides a convenient alias via the MY class.

[ExtUtils::MY](#) might turn out to be a temporary solution, but MY won't go away.
