

NAME

Pod::Perldoc::ToChecker - let Perldoc check Pod for errors

SYNOPSIS

```
% perldoc -o checker SomeFile.pod
No Pod errors in SomeFile.pod
(or an error report)
```

DESCRIPTION

This is a “plug-in” class that allows Perldoc to use [Pod::Simple::Checker](#) as a “formatter” class (or if that is not available, then Pod::Checker), to check for errors in a given Pod file.

This is actually a [Pod::Simple::Checker](#) (or Pod::Checker) subclass, and inherits all its options.

SEE ALSO

[Pod::Simple::Checker](#), [Pod::Simple](#), [Pod::Checker](#), [Pod::Perldoc](#)
