

**NAME**

Class::C3::XS - XS speedups for Class::C3

**SUMMARY**

```
use Class::C3; # Automatically loads Class::C3::XS
# if it's installed locally
```

**DESCRIPTION**

This contains XS performance enhancers for [Class::C3](#) version 0.16 and higher. The main [Class::C3](#) package will use this package automatically if it can find it. Do not use this package directly, use [Class::C3](#) instead.

The test suite here is not complete, although it does verify a few basic things. The best testing comes from running the [Class::C3](#) test suite *after* this module is installed.

This module won't do anything for you if you're running a version of [Class::C3](#) older than 0.16. (It's not a dependency because it would be circular with the optional dep from that package to this one).
