

## NAME

DBI::Const::GetInfoType - Data describing GetInfo type codes

## SYNOPSIS

```
use DBI::Const::GetInfoType;
```

## DESCRIPTION

Imports a `%GetInfoType` hash which maps names for GetInfo Type Codes into their corresponding numeric values. For example:

```
$database_version = $dbh->get_info( $GetInfoType{SQL_DBMS_VER} );
```

The interface to this module is new and nothing beyond what is written here is guaranteed.
