

NAME

SSL_session_reused - query whether a reused session was negotiated during handshake

SYNOPSIS

```
#include <openssl/ssl.h>

int SSL_session_reused(SSL *ssl);
```

DESCRIPTION

Query, whether a reused session was negotiated during the handshake.

NOTES

During the negotiation, a client can propose to reuse a session. The server then looks up the session in its cache. If both client and server agree on the session, it will be reused and a flag is being set that can be queried by the application.

RETURN VALUES

The following return values can occur:

- 0 A new session was negotiated.
- 1 A session was reused.
