

NAME

dpkg.cfg - dpkg configuration file

DESCRIPTION

This file contains default options for dpkg. Each line contains a single option which is exactly the same as a normal command line option for dpkg except for the leading hyphens which are not used here. Quotes surrounding option values are stripped. Comments are allowed by starting a line with a hash sign (`#`).

FILES

`/etc/dpkg/dpkg.cfg.d/[0-9a-zA-Z_]*`
`/etc/dpkg/dpkg.cfg`
`~/.dpkg.cfg`

AUTHOR

See `/usr/share/doc/dpkg/THANKS` for the list of people who have contributed to **dpkg**.
