

NAME

chkfont - checks figlet 2.0 and up font files for format errors

SYNOPSIS

chkfont [*fontfile*]

DESCRIPTION

This program checks figlet 2.0 and up font files for format errors. It also looks for signs of common problems and gives warnings. chkfont does not modify font files.

EXAMPLES

To use **chkfont** on the big font

```
example% chkfont /usr/share/figlet/big.fff
```

BUGS

Doesn't work on compressed font files.
