

**NAME**

figlist - lists figlet fonts and control files

**SYNOPSIS**

**figlist** [ **-d** *directory* ]

**DESCRIPTION**

Lists all fonts and control files in figlet's default font directory. Replaces figlet -F, which was removed from figlet version 2.1.

**EXAMPLES**

To use **figlist** with its default settings, simply type

```
example% figlist
```

To list all the font and control files in /usr/share/fonts/figlet

```
example% figlist -d /usr/share/fonts/figlet
```

**AUTHORS**

figlist was written by Glenn Chappell <ggc@uiuc.edu>

This manual page was written by Jonathon Abbott for the Debian Project.
