

NAME

figlist - lists figlet fonts and control files

SYNOPSIS

figlist [**-d** *directory*]

DESCRIPTION

Lists all fonts and control files in figlet's default font directory. Replaces figlet -F, which was removed from figlet version 2.1.

EXAMPLES

To use **figlist** with its default settings, simply type

```
example% figlist
```

To list all the font and control files in /usr/share/fonts/figlet

```
example% figlist -d /usr/share/fonts/figlet
```

AUTHORS

figlist was written by Glenn Chappell <ggc@uiuc.edu>

This manual page was written by Jonathon Abbott for the Debian Project.
