NAME
addgnupghome - Create .gnupg home directories

SYNOPSIS
addgnupghome *account_1 account_2...account_n*

DESCRIPTION
If GnuPG is installed on a system with existing user accounts, it is sometimes required to populate the GnuPG home directory with existing files. Especially a '*trustlist.txt*' and a keybox with some initial certificates are often desired. This scripts help to do this by copying all files from '*/etc/skel/.gnupg*' to the home directories of the accounts given on the command line. It takes care not to overwrite existing GnuPG home directories.

addgnupghome is invoked by root as:

addgnupghome account1 account2 ... accountn
