

NAME

fatlabel - set or get MS-DOS filesystem label

SYNOPSIS

fatlabel *DEVICE* [*LABEL*]

DESCRIPTION

fatlabel set or gets a MS-DOS filesystem label from a given device.

If the label is omitted, then the label name of the specified device is written on the standard output. A label can't be longer than 11 bytes.

OPTIONS

-h, --help

Displays a help message.

-V, --version

Shows version.
