

**NAME**

fsck.nfs - Dummy fsck.nfs script that always returns success.

**SYNOPSIS**

**fsck.nfs**

**DESCRIPTION**

Debian GNU/Linux need this for when the root file system is on NFS: there is no way to find out if root is NFS mounted and we really want to do a fsck -a /.

**EXIT CODE**

The exit code returned by **mount.nfs** is always zero, meaning successful completion.
