

**NAME**

ip-netconf - network configuration monitoring

**SYNOPSIS**

**ip** [ ip-OPTIONS ] **netconf show** [ **dev** *NAME* ]

**DESCRIPTION**

The **ip netconf** utility can monitor IPv4 and IPv6 parameters (see `/proc/sys/net/ipv[4|6]/conf/[all|DEV]/`) like forwarding, `rp_filter` or `mc_forwarding` status.

If no interface is specified, the entry **all** is displayed.

**ip netconf show - display network parameters**

**dev** *NAME*

the name of the device to display network parameters for.
