

NAME

resizepart - tell the kernel about the new size of a partition

SYNOPSIS

resizepart *device partition length*

DESCRIPTION

resizepart tells the Linux kernel about the new size of the specified partition. The command is a simple wrapper around the "resize partition" ioctl.

This command doesn't manipulate partitions on a block device.

PARAMETERS

device The disk device.

partition

The partition number.

length The new length of the partition (in 512-byte sectors).

SEE ALSO

[addpart\(8\)](#), [delpart\(8\)](#), [fdisk\(8\)](#), [parted\(8\)](#), [partprobe\(8\)](#), [partx\(8\)](#)

AVAILABILITY

The resizepart command is part of the util-linux package and is available from <ftp://ftp.kernel.org/pub/linux/utils/util-linux/>.
