

NAME

systemd-hostnamed.service, systemd-hostnamed - Host name bus mechanism

SYNOPSIS

systemd-hostnamed.service

/lib/systemd/systemd-hostnamed

DESCRIPTION

systemd-hostnamed is a system service that may be used as a mechanism to change the system's hostname. systemd-hostnamed is automatically activated on request and terminates itself when it is unused.

The tool [hostnamectl\(1\)](#) is a command line client to this service.

See the [developer documentation](#)^[1] for information about the APIs systemd-hostnamed provides.

SEE ALSO

[systemd\(1\)](#), [hostname\(5\)](#), [machine-info\(5\)](#), [hostnamectl\(1\)](#), [sethostname\(2\)](#)
