

NAME

update-command-not-found - update the command-not-found cache

SYNOPSIS

update-command-not-found [-h|--help|-n|--no-apt-file]

DESCRIPTION

update-command-not-found updates the cache (databases) for command-not-found using the files in /var/cache/apt/apt-file, which are fetched by apt-file.

OPTIONS**-h or --help**

Print the help message

-n or --no-apt-file

Do not run apt-file update before updating the cache.
